

Mold Production Process

1. Early Discussions
2. Mold Structure Design
3. Internal Meeting
4. Simulate the Flow Of Molten Metal According To CAD, CAM

Developed by KRICO and Metal research center

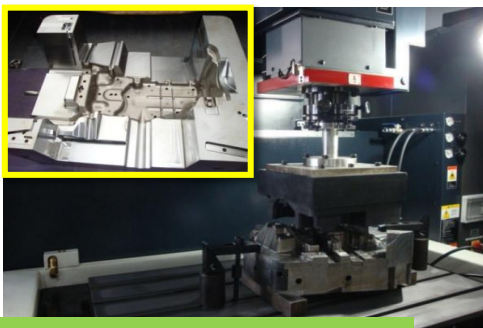

5. Machining Center

Equipment: MAKINO (SNC-64)

6. Heat Treatment

7. EDM

Equipment: MAKINO (EDNC-85)

8. Modification Process

9. CMM Measurement

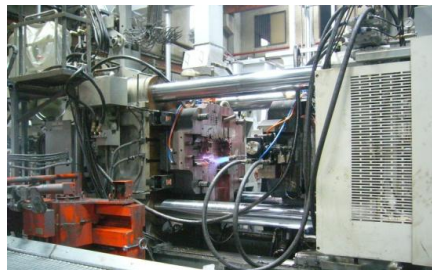

10. Matching

Equipment: WETORI (IDS-100S-1310)

11. Assembly

12. Sample Run

Equipment: TOSHIBA (DC800J)

13. Mold Check

Equipment: GOM
Model: ATOS
Compact Scan 5M

14. Product Testing

15. Mass Production
