Spotlight on Taiwan!

TAMI

臺灣機械工業同業公會
TAIWAN ASSOCIATION OF MACHINERY INDUSTRY

Taiwan Association of Machinery Industry (TAMI) was founded in 1945. Throughout the past 80 years, TAMI has continued to play a key role in the machinery industries. Among our member companies, the machine tool industry is the leading force that drives Taiwan's entire machinery business to pursue a higher technical level and better profitability, thus elevating Taiwan's machinery industry as a major player in the global market.

Acting as the bridge between machine tool builders and the government, TAMI establishes a platform on which members may cooperate with each other and form a strategic alliance. Additionally, members can rectify the supply chain so as to benefit both buyers and sellers. Furthermore, TAMI organizes business and technical seminars and machinery forums periodically. Nowadays TAMI has more than 2,700 members. We value all opportunities to offer members superior professional support.

For more information about TAMI, please visit our website at:

www.tami.org.tw
